New Jersey Solar Market Update

September 2006

FORECASTS & MARKET NEWS:

SREC DEMAND: Compliance filing from entities subject to NJ's RPS rules for Reporting Year 2006 are due on September 1, 2006. **The forecast demand for NJ SRECs in reporting year 2006 (June 1, 2005 thru May 31, 2006)** was **8,288 SRECs** based upon estimated retail electric sales of 73,200,000 MWh, the RPS percentage of 0.017%, and less the load served by 2003 BGS Auction winners granted an exemption from the solar percentages in the first year. **As of June 30, 2006, a total of 10,075 SRECs had been issued for Reporting Year 2006** (June 1, 2005 - May 31, 2006) to solar facilities that registered for the SREC program.

The forecast demand for NJ SRECs in reporting year 2007 (June 1, 2006 thru May 31, 2007) is **29,000 SRECs** based upon estimated retail electric sales of 73,800,000 MWh, the RPS percentage of 0.0393%.

PJM GATS: The **PJM Environmental Information Services (PJM EIS)** launched the Generation Attribute Tracking System (GATS) for the PJM Mid Atlantic region in October 2005. The Generation Attribute Tracking System (GATS) provides information about how megawatt-hours of electricity were generated and is used to track compliance with renewable portfolio standards and other environmental disclosure requirements. In February 2006, PJM GATS reported 14,282,070 renewable energy certificates generated in 2005 during the first annual Trading Period, which represents 2.02 percent of the total PJM System Mix but does not include New Jersey Solar and other distributed resources which are behind the meter. For additional information, go to www.pjm-eis.com or contact GATSAdmin@pjm-eis.com.
