

## Covenant Solar Tech

### Limited Lifetime Workmanship Warranty

At Covenant Solar Tech we give peace of mind about your future to your present today. We take pride in the high-quality materials and workmanship we provide in each one of our installations. Each System is professionally installed by our trained technicians. As a result of this, Covenant Solar Tech extends a **LIFETIME LIMITED WORKMANSHIP WARRANTY** against leaks (water penetration) caused by the installation of the Solar System **for the life of the homeowner's existing shingle roof. This Labor Warranty is transferable once to the next home buyer.** In the event of a new roof application, Covenant Solar Tech will no longer warrant the install under this contract. The roofing contractor will be responsible for all new flashing and sealing of Solar System. We can provide removal and reinstall services under a separate contract.

The LIFETIME LIMITED WORKMANSHIP WARRANTY applies to all System related roof penetrations made during installation of the System by Covenant Solar Tech. This warranty does not cover i) pre-existing conditions, ii) damage related to acts of God, weather conditions, storm damage, fire, flood, earthquake, settlement or deterioration of the building structure, improper care, accidental or intentional damage, or any cause beyond Covenant Solar Tech's control. iii) leaks occurring in other areas of the roof.

Workmanship for all other roof types (other than shingle) and commercial applications are warranted for a period of three years from the date of installation.
